

micro S DF Dark: The traditional Kellermann now in super small!

Kellermann presents the famous model now as extremely compact version „S“ with 3 in1 light and tinted glass

The Kellermann GmbH (www.kellermann-online.com), experts for premium motorcycle accessories from Aachen in Germany, now present with the micro S DF Dark an extremely compact version "S" of the famous micro 1000® DF Dark.

Due to the drastic reduction in size and the strongly tinted indicator glass with integrated rear and brake light the 3in1 version micro S DF Dark makes all three components almost disappear at the rear of the motorcycle.

The new micro S DF Dark is really super small, it would even fit six times into the larger micro 1000®. This allows an extreme compact and individual design of the tail of the bike. And since Kellermann is the absolute master in high quality compact lights for bikes, this 'Kellermann' also impresses with its amazing illuminating power. The strong double rear lights are keeping traffic at a distance.

As the complete electronics of the micro S DF Dark are in the casing, this indicator can be plugged into the 12 volt net directly.
