

Kellermann Jetstream®:

The world's most spectacular sequential lighting indicator is approaching!

The Kellermann GmbH (www.kellermann-online.com), experts for premium motorcycle equipment Made in Germany, presents the Kellermann Jetstream®, probably the most spectacular motorcycle indicator ever build. The Kellermann Jetstream® will be available as a sequential lighting indicator and as a 3in1 version with a combination of rear, brake, and sequential lighting indicator.

The design of the Kellermann Jetstream® integrates elements from aviation design and has the shape of a wing with an integrated jet engine. The Kellermann Jetstream® is distinctively and shapely designed, an absolute eyecatcher! The shape is extremely aerodynamic and therefore also at high speeds very streamlined.

The illuminating power of the Kellermann Jetstream® is extreme, no other motorcycle indicator with sequential lighting and ECE approval gets even close, the brightness is unmatched. The indicator is emitted as a super bright and slit-like beam along the edge of the wing. In the 3in1 version the equally strong rear and brake lights are added, the well-proven Atto technology is placed in the jet engine channel.

Based on 16 high power LEDs the unbelievable illuminating power of the Kellermann Jetstream® contributes towards more safety on the road, because the motorcycle is better and earlier visible when approaching at high speed. Especially overtaking becomes safer as the vehicle ahead is strongly warned by the extreme illuminating power, the danger of inadvertently change of lanes is reduced.

The strong illuminating power also raises the safety buffer during all other turning or braking maneuvers as other road users are clearly warned about-turn maneuvers, with the sequential lighting indicator at the front and rear, and also the 3in1 combination during braking maneuvers.

Dr. Stefan Wöste, CEO Kellermann GmbH on the Jetstream®: 'This extremely bright and dynamically pulsating sequential indicator with its unique light orchestration pushes the envelope of what is technically possible and will define a new benchmark in the segment of exclusive motorcycle accessories.'

Jetstream® range and sales launch :

At the start the Kellermann Jetstream® will be available in two variants. As a sequential lighting indicator it can be installed at the front and rear of the motorcycle. The 3in1 version with a combination of rear, brake, and sequential lighting indicator can be installed at the rear of the bike.

The RRP of the Jetstream® indicator is 149.95 EUR.

The RRP of the Jetstream® DF is 159.95 EUR.

Both products will available starting April 2022 in the new Kellermann Online Shop www.kellermann-online.com and at our retail partners.

Kellermann Jetstream® overview :

- Highest illuminating power
- Kellermann high power LED technology
- State-of-art „IC“- chip technology
- 32 MHz real time micro processor controlled
- Silent-Current, advanced Power Saving algorithm
- High measure of visibility across a wide angle range
- Longlife Protection Guard
- Suitable for 12 volt DC applications
- Flow-optimized metal housing, high quality manufacturing
- M8 x 20mm thread
- High-quality vibration-absorbing bearing
- ECE-approved
- Global design protection

Kellermann – High quality motorcycle products – Made in Germany

Kellermann company profile:

The Kellermann company (www.kellermann-online.com) from Aachen, Germany, is a manufacturer of high quality motorcycle accessories. The company is one of the market leaders in the segment of high tech indicators for motorbikes. In the motor bike scene the noble products are true cult and only referred to as 'Kellermann's'. These indicators set trends in the market and open up a new world on how to personalize motorcycles. Kellermann delivers high tech without any compromise in an elegant and innovative design.
