

## **World premiere: Kellermann Dayron®**

### **The sensationally bright daytime running light for all bikes, also with indicator!**

18.11.2020 - The Kellermann GmbH ([www.kellermann-online.com](http://www.kellermann-online.com)), experts for premium motorcycle equipment Made in Germany, presents with the Kellermann Dayron® the first high performance daytime running light for motorcycles with ECE approval. As a specialist for motorcycle light technology Kellermann offers the Dayron® as a daytime running light or – a world premiere – with the Dayron® *I* as a daytime running light with indicator.

The sensational illumination power makes every motorcycle more visible in traffic during the day – more safety from dawn till dusk through more visibility on the road! And with the Dayron® *I* Kellermann is the first manufacturer worldwide to offer the combination of a daytime running light with an indicator. The complete illumination surface of the Dayron® *I* is switching from white to yellow light during flashing. This illumination power and signal effect is legally available only from Kellermann. The Kellermann Dayron®/Dayron® *I* was designed with great attention to detail, it has the look and feel of power and strength. The Dayron® visually fits just perfect on all motorcycles, from adventure and cruiser to café racer bikes. Kellermann gave this ultra-modern daytime running light a rich yet distinctive look: The Dayron®/Dayron® *I* is a functional and smart piece of jewellery for every bike!

The specifically developed smart control guarantees the communication of all components and a constant illumination power on both lights in all weather and temperature conditions. The Dayron®/Dayron® *I* can be installed on almost all motorcycles with and without existing original daytime running light.

Electronic accessories will be available soon.
