

Kellermann Atto® DF: The 3in1 sensation!

The smallest combination-indicator-rear-brake light in the world: with a light surface which fits four times on a 1 Cent coin

The Kellermann GmbH (www.kellermann-online.com) experts in the field of accessories for motorcycles, located in Aachen, made the impossible possible. With the Atto® DF, they present the smallest street legal combination-indicator-rear-brake light of the world for motorcycle.

The Atto® DF is the newest and most spectacular member of the highly successful Atto® family of Kellermann. The Atto® indicator and Atto® RB rear/brake light, already defined a completely new category in the motorcycle lighting segment. The Atto® DF now offers all three functions fully street legal in one product – simply put: 3in1! Moreover the Atto® DF is as small as all members of the Atto® family: the illuminated surface fits four times on a tiny 1 cent coin!

With the Atto® DF the bike's rear gets a completely new look. Gone are the times of ugly red and yellow, with the Atto® DF a clean and individual design is now possible. At this size this is a real first: with two Atto® DF all functions are visually perfect and fully street!

Kellermann CEO Dr. Stefan Wöste: „The Atto® DF offers unbelievable illuminating power - typical for all Kellermann products. But behind it, is a real masterpiece hidden. The sought after 3in1 function in such a minimalistic casing allows a clean customization of the bike. Like never before!“

Street safety always comes first for Kellermann. The Atto® DF is visually almost disappearing on a bike but once it kicks into action it is warning with relentless illuminating power, no matter if indicator, rear or brake light. This 3in1 light beams strongly and keeps the traffic at distance. Naturally fully street legal, as all products by Kellermann.

The entire Atto® family is driven by an optimized light channeling, managed through a smart system of lenses and reflectors (Extreme Optical Transparency). The result is sensational illuminating power and minimal size at the same time.

As the complete electronics of the Kellermann Atto® DF are in the casing, this combination-indicator-rear-brake light can be plugged into the 12 volt net directly.

Kellermann Atto® DF: Indicator, rear and brake light - The 3in1 sensation!

Atto® DF features:

- Replaces existing rear and brake light and indicators
